

Operations Manager System Test Evaluation Form - UI and Design Test

Operations Manager Name: _____ Test Date: _____

Position/Role: _____ Department: _____

System/Module Reviewed: _____

Purpose

This evaluation helps the Operations Manager verify whether the system qualifies with company design standards, employee standards, and operational needs. The review should consider whether the system can support smooth daily operations, reliable coordination, and long-term business benefit.

Company Design Standards

Review whether the system interface is professional, consistent, and suitable for company-wide operational use.

Rating: ☐ 1 Poor ☐ 2 Fair ☐ 3 Good ☐ 4 Very Good ☐ 5 Excellent

Items to verify:

- ☐ Interface design is clean, organized, and company-appropriate.
- ☐ Visual elements, forms, tables, buttons, and labels are consistent.
- ☐ Screens are clear enough for operational monitoring and review.
- ☐ The design supports formal recruitment and operational workflows.

Operations Manager comments, findings, or required improvements:

Employee and Operational Standards

Review whether the system supports employees, supervisors, HR, and operations users in completing work accurately.

Rating: ☐ 1 Poor ☐ 2 Fair ☐ 3 Good ☐ 4 Very Good ☐ 5 Excellent

Items to verify:

- ☐ Users can follow the workflow without unnecessary confusion.
- ☐ The system supports accurate records and process visibility.
- ☐ The interface reduces manual work, delays, or repeated follow-ups.
- ☐ The system is practical for daily operational use.

Operations Manager comments, findings, or required improvements:

Operations Manager Name: _____ Test Date: _____

System/Module Reviewed: _____

Evaluation Continuation

Use this page to assess whether the system will provide long-term operational value and whether it should be recommended for continued improvement, user testing, or deployment.

Long-Term Operational Benefit

Assess whether the system can improve operational control, recruitment coordination, process tracking, and business efficiency over time.

Rating: ☐ 1 Poor ☐ 2 Fair ☐ 3 Good ☐ 4 Very Good ☐ 5 Excellent

Items to verify:

- ☐ The system can improve process monitoring and accountability.
- ☐ The system can reduce manual coordination and process errors.
- ☐ The system can support branch, HR, and operations alignment.
- ☐ The long-term operational benefit justifies continued use or improvement.

Operations Manager comments, findings, or required improvements:

Overall UI and Operational Qualification

Decide whether the system interface and design are acceptable from an operations management perspective.

Rating: ☐ 1 Poor ☐ 2 Fair ☐ 3 Good ☐ 4 Very Good ☐ 5 Excellent

Items to verify:

- ☐ The system is visually acceptable for company operations.
- ☐ The system is practical for employees, HR, and management users.
- ☐ The design supports reliable tracking, reporting, and decision-making.
- ☐ The system is ready for user testing, rollout, or further revision.

Operations Manager comments, findings, or required improvements:

Final Operations Manager Recommendation

- ☐ Qualified and beneficial for long-term operational use
- ☐ Qualified with minor improvements
- ☐ Needs major improvements before operational use

Summary opinion and recommendation:
